

ServiceNow Standard Laptop Procurement Automation

Module 1 of 8 — Project Overview & Objective

Project Overview & Objective

Project Title	ServiceNow Standard Laptop Procurement Automation
Platform	ServiceNow
Primary Tool	Flow Designer
Application	Global
Flow Name	Standard Laptop Task
Objective	Create an automated catalog task for the Standard Laptop service so that, after the service request is approved, a catalog task is created with the required short description, description, approval status, and Hardware assignment group.
Business Purpose	The automation reduces manual work in the laptop procurement/configuration process, improves consistency, and helps the IT team process approved requests more efficiently.
Overall Workflow	Standard Laptop service request → Approval → Flow execution → Create Catalog Task → Assign to Hardware → Update task details → Verify the created task.
