

ServiceNow Standard Laptop Procurement Automation

Module 2 of 8 — Create the Flow in Flow Designer

Create the Flow in Flow Designer

Step 1	Open ServiceNow.
Step 2	Click All and search for Flow Designer.
Step 3	Open Flow Designer under Process Automation.
Step 4	Click New and select Flow.
Step 5	Under Flow Properties, enter the Flow Name as Standard Laptop Task.
Step 6	Set Application to Global.
Step 7	Set Run As to System user.
Step 8	Click Submit.
Expected Result	A new Flow Designer flow named Standard Laptop Task is created and ready for configuration.
