

ServiceNow Standard Laptop Procurement Automation

Module 3 of 8 — Configure the Service Catalog Trigger

Configure the Service Catalog Trigger

Step 1	In the newly created flow, click Add a trigger.
Step 2	Search for Service Catalog.
Step 3	Select the Service Catalog trigger.
Step 4	Complete the trigger configuration required by the instance.
Step 5	Click Done.
Purpose	The Service Catalog trigger starts the flow when the relevant catalog request/requested-item event occurs.
Expected Result	The Service Catalog trigger appears at the beginning of the flow and is ready to pass the Requested Item information to the action.
