

ServiceNow Standard Laptop Procurement Automation

Module 8 of 8 — Verify the Catalog Task & Project Conclusion

Verify the Catalog Task & Project Conclusion

Step 1	Open the Requested Item record.
Step 2	Scroll down to the Catalog Tasks section.
Step 3	Open the generated catalog task.
Step 4	Verify the Short description is Laptop need to Configured.
Step 5	Verify the Description is Laptop need to Configured.
Step 6	Verify the Assignment group is Hardware.
Step 7	Verify the Approval value is Approved, where displayed on the generated task.
Final Outcome	The approved Standard Laptop request automatically produces the configured catalog task and routes it to the Hardware assignment group.
Conclusion	By automating the Standard Laptop procurement process with ServiceNow Flow Designer, the project reduces manual overhead and creates a consistent workflow for approved requests. The automation supports timely laptop configuration, improves resource allocation, and provides a clearer experience for both requesters and IT support teams.
Key Benefits	Reduced manual processing; consistent task creation; automatic Hardware assignment; improved workflow visibility; faster handling of approved laptop requests; better operational efficiency.
